

Power Spectra of Dark Matter:

- **fulla:**/lustre/sleitner/ic/ic-all/DAT/spectra there is all spectra, which takes the spectra of all the files in DAT
- **spec.cray** takes the spectra of individual dark matter files (given their name)
 - dumps spectra back into the current directory and takes the DAT directory as a variable.
 - rsyncs them to leda
- **leda:**fromfulla/**gen.plt** generates a plot of spectra.
